| . . | Poliobility Indicatory |
|------------|--|
| | Reliability Indicator: |
| | |
| | lazardous Locations/environmental Protection: /ibration resistant |
| | |
| | Overall Length: |
| | 0.540 inches |
| | mpedance Rating In Ohms: |
| | 00.0 single component single secondary |
| | Frequency Rating: |
| | 300.0 hertz single component and 100.0 kilohertz single component |
| | Aximum Transformer Power Rating: |
| | 00.0 milliwatts single component |
| | Vinding Shielding Method: |
| | Core grounded and brought out to terminal single component |
| | Overall Diameter: |
| | 0.390 inches |
| | Aximum Operating Temp: |
| 1 | 05.0 degrees celsius |
| | End Application: |
| 5 | 895-01-133-6600, control, communication |
| I | nclosure Type: |
| F | Fully enclosed |
| N | lounting Method: |
| ٦ | erminal single group |
| ١ | Vinding Function And Quantity: |
| 1 | primary single component and 1 secondary single component |
| F | Features Provided: |
| ٦ | inned wire leads |
| ١ | Vinding Operating Current: |
| 3 | 3.0 milliamperes dc single component single primary |
| ٦ | Ferminal Type And Quantity: |
| 5 | i wire lead |
| Ş | Shelf Life: |
| ٢ | √a |
