Reliability Indicator:

Not established

Overall Length:

0.938 inches

Frequency Rating:

60.0 hertz single component and 400.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Maximum Transformer Power Rating:

2.0 volt-ampere single component

Overall Diameter:

2.375 inches

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 secondary single component

Winding Operating Current:

50.0 amperes ac single component single primary

Special Features:

Primary rated but not included

Terminal Type And Quantity:

2 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
