Reliability Indicator:

Not established

Overall Length:

0.787 inches

Inductance Rating:

7.00 microhenries single component single winding

Input-output Phase Relationship:

Single phase to single phase 2nd component

Overall Diameter:

0.750 inches

Maximum Operating Temp:

65.0 degrees celsius

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Rating Method:

Electrical single component single winding

Winding Function And Quantity:

1 primary 2nd component and 1 secondary 2nd component

Winding Operating Current:

5.0 amperes ac single component single primary

Dc Resistance Rating In Ohms:

0.800 single component single secondary

Terminal Type And Quantity:

8 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
