# **Reliability Indicator:**

Not established

# Overall Length:

0.815 inches

# **Turn Quantity:**

7-1/2 single component single winding

### Inductance Rating:

370.00 microhenries single component single winding and 620.00 microhenries single component single winding

# **Coil Form Type:**

Hollow single component

# Adjustment Device Drive Type:

Hex socket single component

# Inclosure Type:

Open

#### **Mounting Method:**

Terminal single group

#### **Rating Method:**

Electrical single component single winding and winding turns single component single winding

# Winding Conductor Size:

0.00893 inches american wire gage single component single winding

# Winding Operating Current:

5.0 milliamperes dc single component single winding

# Adjustment Method And Quantity:

1 adjustable core single component

#### **Terminal Type And Quantity:**

2 pin

Shelf Life:

N/a

Unit Of Measure:

--

#### Demilitarization:

No

# Fiig:

A058b0
