**Reliability Indicator:**

Not established

**Overall Height:**

4.060 inches

**Frequency Rating:**

50.0 hertz single component and 400.0 hertz single component

**Input-output Phase Relationship:**

Single phase to single phase single component

**Maximum Transformer Power Rating:**

12.5 volt-ampere single component

**Body Length:**

3.500 inches

**Body Width:**

1.130 inches

**Distance Between Mounting Facility Centers:**

1.000 inches single mounting facility single center group

**Inclosure Type:**

Fully enclosed

**Mounting Method:**

Terminal single group

**Winding Function And Quantity:**

1 secondary single component

**Winding Operating Current:**

500.0 amperes ac single component single primary

**Special Features:**

Primary rated but not included

**Terminal Type And Quantity:**

2 threaded stud

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A058b0
