Reliability Indicator:

Not established

Overall Length:

10.750 inches

Overall Height:

6.750 inches

Overall Width:

7.440 inches

Frequency Rating:

400.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

End Application:

Misc parts power distance system ddg 0087 for ddg 51 class ship

Inclosure Type:

Fully enclosed

Winding Operating Current:

41.67 amperes ac single component single secondary

Winding Operating Voltage:

450.00 ac volts single component single primary

Special Features:

temp rise: 150 degrees c, ambient: 50 degrees c

Terminal Type And Quantity:

4 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
