| Reliability Indicator:                        |
|---|
| Not established                               |
| Overall Length:                               |
| 0.950 inches                                  |
| Frequency Rating:                             |
| 300.0 hertz single component                  |
| <b>Body Outside Diameter:</b>                 |
| 1.190 inches                                  |
| Inclosure Type:                               |
| Fully enclosed                                |
| Mounting Facility Quantity:                   |
| 1 single group                                |
| Mounting Method:                              |
| Threaded stud single group                    |
| Winding Operating Voltage:                    |
| 7.00 ac volts single component single primary |
| Terminal Type And Quantity:                   |
| 5 turret                                      |
| Shelf Life:                                   |
| N/a   |
| Unit Of Measure:                              |
|   |
| Demilitarization:                             |
| No  |
