Reliability Indicator:

Not established

Inductance Rating:

26.00 microhenries single component 3rd winding

Body Length:

Between 0.740 inches and 0.800 inches

Body Width:

Between 0.740 inches and 0.800 inches

Body Height:

0.875 inches

Maximum Operating Temp:

85.0 degrees celsius

Winding Quantity:

3 single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Rating Method:

Electrical single component all winding

Winding Operating Current:

500.0 milliamperes dc single component 2nd winding

Terminal Type And Quantity:

6 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
