| Reliability Indicator:                              |
|---|
| Not established                                     |
| Inductance Rating:                                  |
| 470.00 microhenries single component single winding |
| Rating Method:                                      |
| Electrical single component single winding          |
| Special Features:                                   |
| Laminated ferrite                                   |
| Shelf Life:   |
| N/a   |
| Unit Of Measure:                                    |
|   |
| Demilitarization:                                   |
| No  |
| Fiig:   |
| A058b0  |
