| Reliability Indicator:       |
|------------------------------|
| Not established              |
| Inductance Type:             |
| Fixed                        |
| Winding Quantity:            |
| 1 single component           |
| Inclosure Type:              |
| Fully enclosed               |
| Mounting Facility Quantity:  |
| 4 single group               |
| Mounting Method:             |
| Unthreaded hole single group |
| Shelf Life:                  |
| N/a                          |
| Unit Of Measure:             |
|                              |
| Demilitarization:            |
| No                           |
| Fiig:                        |
| A058b0                       |
|                              |
