**Reliability Indicator:**

Established

**Overall Length:**

14.340 inches

**Overall Height:**

12.500 inches

**Overall Width:**

8.380 inches

**Frequency Rating:**

50.0 hertz single component or 60.0 hertz single component

**End Application:**

Visual landing aids aircraft launching recovery equipment

**Special Features:**

Input voltage 120v ac; rated current 50a; ambient temp range -20 degrees c to 55 degrees c; dial plate is aluminum alloy 0.051 in. Thick  
nom. W/increments divided into 50 equal spaces

**Terminal Type And Quantity:**

1 clamp

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A058b0
