Reliability Indicator:

Not established

Inductance Rating:

0.10 millihenries single component 1st winding

Body Length:

3.281 inches

Body Width:

3.125 inches

Maximum Operating Temp:

65.0 degrees celsius

Winding Quantity:

2 single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Rating Method:

Electrical single component all winding

Winding Operating Current:

950.0 milliamperes dc single component 2nd winding

Dc Resistance Rating In Ohms:

1.300 single component 2nd winding

Terminal Type And Quantity:

4 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
