Reliability Indicator:

Not established

Turn Quantity:

53 single component single winding

Inductance Rating:

39.00 microhenries single component single winding

Body Length:

0.500 inches

Body Outside Diameter:

1.000 inches

Inclosure Type:

Fully enclosed

Special Features:

Terminal 1 and 1a is positioned at 50 degree angle to terminal 2 and 2a; connection provides dual connections

Terminal Type And Quantity:

4 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
