Reliability Indicator:

Not established

Frequency Rating:

300.00 kilohertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Inclosure Type:

Fully enclosed

Winding Operating Current:

3.1 amperes ac single component 2nd secondary

Winding Operating Voltage:

9.60 ac volts single component 2nd secondary

Terminal Type And Quantity:

7 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
