Reliability Indicator:

Not established

Frequency Rating:

20.0 kilohertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Inclosure Type:

Fully enclosed

Winding Function And Quantity:

1 secondary single component

Winding Operating Current:

2.5 amperes ac single component single primary

Special Features:

Primary rated but not included

Terminal Type And Quantity:

Turret

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
