Reliability Indicator:

Not established

Inductance Rating:

50.00 microhenries all components single winding

Winding Quantity:

2 single component

Inclosure Type:

Fully enclosed

Rating Method:

Electrical all components single winding

Winding Operating Current:

660.0 milliamperes dc all components single winding

Dc Resistance Rating In Ohms:

0.167 all components single winding

Terminal Type And Quantity:

4 bonding pad

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
