Reliability Indicator:

Not established

Overall Length:

0.965 inches

Frequency Rating:

400.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Body Outside Diameter:

1.220 inches

End Application:

Coast guard hu-25 aircraft

Inclosure Type:

Fully enclosed

Winding Operating Current:

13.00 amperes dc single component all primary

Winding Operating Voltage:

80.00 dc pounds per hour wet single component single primary

Terminal Type And Quantity:

10 solder stud

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
