Reliability Indicator:

Not established

Overall Length:

2.000 inches

Overall Width:

2.000 inches

Inductance Rating:

200.00 microhenries single component single primary

Overall Diameter:

3.750 inches

End Application:

E/i ssm-xmitter group

Winding Quantity:

1 single component

Inclosure Type:

Fully enclosed

Rating Method:

Electrical single component single primary

Terminal Type And Quantity:

2 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
