Reliability Indicator:

Not established

Overall Length:

19.630 inches

Overall Height:

11.500 inches

Overall Width:

11.680 inches

Frequency Rating:

47.0 hertz single component and 63.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

End Application:

Aircraft, eagle f-15

Inclosure Type:

Partially enclosed

Winding Operating Voltage:

96.00 ac pounds per hour dry single component single primary and 132.00 ac pounds per hour with retaining chain single component single primary

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
