Reliability Indicator:

Not established

Turn Quantity:

50/60 single component single winding

End Application:

Used on solenoid valves

Winding Quantity:

2 all components

Inclosure Type:

Partially enclosed

Winding Conductor Size:

6.00000 inches standard wire gage single component single winding

Special Features:

One coil fits all valves sizes, space saving designs (junction box) 6" lead std., hi temperature, mg 120 volts, coil windings are insulated to provide water, shock and vibration protection, coil is replaceable without having to shut down line pressure

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
