Reliability Indicator:

Not established

Overall Length:

5.3 millimeters

Body Outside Diameter:

7.8 millimeters

Inclosure Type:

Partially enclosed, double shell

Special Features:

Test frequency 1khz, test voltage: 1v, operating temperature: -40deg c to +105 degrees c; storage temperature: -40 c to + 125 degrees c; material: core: ferrite dr core, wire: enamelled copper wire; terminal electrode: ag & sn/pb, temperature rise: 40 degrees c max. At rated current, packaging: 1000 pcs per reel

Terminal Type And Quantity:

2 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
