Reliability Indicator:

Not established

Overall Length:

12.750 inches

Overall Height:

9.375 inches

Overall Width:

8.500 inches

Frequency Rating:

60.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

End Application:

Misc parts electrical for mcm 0008

Inclosure Type:

Fully enclosed

Winding Operating Current:

25.0 amperes ac single component single secondary

Winding Operating Voltage:

120.00 ac volts single component single secondary

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
