End Application:

B757 aircraft, next higher assembly main electronics eqpt ctr (transformer rectifier only), eldec corporation

Product Name:

Transformer assembly-rectifier

Special Features:

Converts 3 phase 115 volts ac input power into unregulated 28 volts dc output power for the airplanes dc loads

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
