Reliability Indicator:

Not established

Inductance Rating:

2.70 henry single component single primary

Body Length:

1.000 millimeters

Body Width:

0.50 millimeters

Body Height:

0.50 millimeters

End Application:

C-17a aircraft

Inclosure Type:

Fully enclosed

Rating Method:

Electrical single component single primary

Winding Operating Current:

400.0 milliamperes dc single component single primary

Dc Resistance Rating In Ohms:

0.100 single component single primary

Terminal Type And Quantity:

2 bonding pad

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
