Reliability Indicator:
Not established
Inductance Rating:
2.70 henry single component single primary
Body Length:
1.000 millimeters
Body Width:
0.50 millimeters
Body Height:
0.50 millimeters
End Application:
C-17a aircraft
Inclosure Type:
Fully enclosed
Rating Method:
Electrical single component single primary
Winding Operating Current:
400.0 milliamperes dc single component single primary
Dc Resistance Rating In Ohms:
0.100 single component single primary
Terminal Type And Quantity:
2 bonding pad
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A058b0
