Reliability Indicator:

Not established

End Application:

C-17a aircraft

Rating Method:

Electrical single component single primary

Winding Operating Current:

140.0 milliamperes dc single component single primary

Dc Resistance Rating In Ohms:

2.690 single component single primary

Terminal Type And Quantity:

2 bonding pad

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
