Overall Length:

0.710 inches

Overall Height:

0.280 inches

Overall Width:

0.600 inches

Inductance Rating:

2.20 microhenries single component single primary

Frequency Rating:

80.0 megahertz single component

End Application:

Circuit card assembly

Inclosure Type:

Partially enclosed

Winding Operating Current:

7.1 amperes dc single component single primary

Dc Resistance Rating In Ohms:

0.014 single component single primary

Product Name:

Power inductor

Special Features:

Tolerance 20%

Terminal Type And Quantity:

2 bonding pad

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
