Product Name:

Chip coils, high-frequency monolithic type lqg15h and lqg18h series

Special Features:

High-q, stable inductance in high frequency is achieved by the unique low-capacitance structure, it is suitable for mobile communication equipment; the small size of lqg15h (1 by .5 by .5mm) is ideal for small mobile equipment; the external electrodes with nickel barrier structure provide excellent solder heat resistance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
