**Product Name:**

Chip coils, high-frequency monolithic type lqg15h and lqg18h series

**Special Features:**

High-q, stable inductance in high frequency is achieved by the unique low-capacitance structure, it is suitable for mobile communication equipment; the small size of lqg15h ( 1 by .5 by .5mm) is ideal for small mobile equipment; the external electrodes with nickel barrier structure provide excellent solder heat resistance

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A058b0
