Reliability Indicator:

Not established

Overall Length:

11.250 inches

Overall Height:

18.750 inches

Overall Width:

27.500 inches

Frequency Rating:

60.0 hertz single component

End Application:

Transformer, 22.5 kva d-w

Winding Operating Voltage:

208.00 ac volts single component single secondary or 120.00 ac volts single component single secondary

Special Features:

Enclosure: ip24, delta/wye 22.5 kva, 3 phase, deck mounting, 108.3 primary amperes line, 62.5 secondary amperes line, 4 in. Min.

Clearance reqd for ventilation front and rear

Terminal Type And Quantity:

7 bus (bar) conductor

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
