Reliability Indicator:

Not established

Overall Length:

4.500 inches

Overall Height:

3.200 inches

Overall Width:

3.200 inches

Inductance Rating:

10.0 microhenries single component single primary

Core Construction:

Solid single component

Inclosure Type:

Fully enclosed

Mounting Facility Quantity:

2 single group

Mounting Method:

Terminal single group

Rating Method:

Winding turns single component single primary

Dc Resistance Rating In Ohms:

40.0 single component single primary

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
