Overall Length:

0.071 inches

Overall Height:

0.044 inches

Overall Width:

0.040 inches

Inductance Rating:

0.56 microhenries single component single primary

Frequency Rating:

7.9 megahertz single component

Core Construction:

Solid single component

Maximum Operating Temp:

85.0 degrees celsius

Inclosure Type:

Partially enclosed

Rating Method:

Electrical single component single primary

Dc Resistance Rating In Ohms:

0.44 single component single primary

Product Name:

Inductor, chip

Special Features:

Tolerance = 5%; core material = ceramic/ferrite

Precious Material:

Silver and palladium and platinum

Terminal Type And Quantity:

2 bonding pad

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
