Overall Length:

0.090 inches

Overall Height:

0.060 inches

Overall Width:

0.068 inches

Inductance Rating:

0.24 microhenries single component single primary

Frequency Rating:

100.0 megahertz single component

Core Construction:

Solid single component

Maximum Operating Temp:

125.0 degrees celsius

Inclosure Type:

Partially enclosed

Rating Method:

Electrical single component single primary

Dc Resistance Rating In Ohms:

1.00 single component single primary

Product Name:

Inductor, chip

Special Features:

Tolerance = 2%; core material = ceramic

Precious Material:

Silver and palladium and platinum

Terminal Type And Quantity:

2 bonding pad

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
