Reliability Failure Rate Level In Percent:

5.0

Overall Length:

1.6 millimeters

Overall Height:

0.8 millimeters

Overall Width:

0.8 millimeters

Inductance Rating:

82.0 nanohenry single component all winding

Maximum Operating Temp:

125.0 degrees celsius

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal all groupings

Product Name:

Inductors for high frequency circuits; multilayer ceramic; mlg series

Special Features:

Rohs compliant; compatible with lead free solder; halogen free

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
