Core Construction:

S0lid single component

Body Length:

1.34 inches

Body Width:

1.06 inches

Overall Diameter:

1.45 inches

Winding Quantity:

940 single component

Dc Resistance Rating In Ohms:

9.0 single component 1st control

Product Name:

Coil assembly

Special Features:

voltage: 12vdc, 16 watts; duty cycle intermittent; resistance: 9 ohms +/- 5 degree @ 25 degree celcius; dielectric strenght: 500vrms for 1 second; encapsulation material: type 6/6 nylon 10-15 percent glass; magnet wire: 26.5 awg.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
