Overall Length:

3.328 inches

Overall Height:

0.686 inches

Overall Width:

2.328 inches

Component Type And Quantity:

4 capacitor and 8 coil and 20 crystal and 4 resistor and 1 transistor

Special Features:

Major components: semiconductor device, diode 1; mounting method and configuration: bolt, plate; six 0.140 inch diameter mounting holes on 1.549 inch by 1.781 inch by 2.068 inch mounting centers, bolted to center plate

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
