Environmental Protection:

Moisture proof

Operating Temperature Range:

-55.0/+100.0 degrees celsius

Average Life Measurement:

Not rated

Inclosure Type:

Hermetically sealed

Operating Control Method:

Automatic

Installation Design:

Module

Circuit Construction Type:

Solid state

Precious Material And Location:

Terminal surfaces gold

Precious Material:

Gold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
