Overall Length:

4.980 inches

Overall Height:

1.530 inches

Overall Width:

2.150 inches

Basic Shape Style:

Rectangular or square

Frequency Per Channel:

79.9 megahertz operating channel and 80.0 megahertz operating channel

Average Power Rating Per Channel:

8.4 milliwatts output

External Dc Operating Voltage In Volts:

15.0 single voltage

Special Features:

External power supply

Fsc Application Data:

Direction finder controls, radio navigation, airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
