Overall Length:

4.600 inches

Overall Height:

2.500 inches

Overall Width:

2.500 inches

Operating Temperature Range:

-50.0/+85.0 degrees celsius

Basic Shape Style:

Rectangular or square

Identification Designator:

2394552-28527

Inclosure Type:

Hermetically sealed

Circuit Construction Type:

Solid state

Impedance Rating Per Channel:

200.000 ohms operating channel

Distortion Type And Percent:

1.0 frequency

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
