Tube Type:

Klystron

Special Features:

The required klystron will be used in a multi-carrier communications transmitter to amplify an fm signal from a low level source. This tube will complete a communications transmitter when coupled to a modulated rf source, high voltage power supply, control protection system, cooling device and rf output support network

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A516k0
