End Application:

B52 wst

Tube Type:

Camera

Features Provided:

Electromagnetic interference shielding

Special Features:

Camera tube with a photoconductive target composed of cadmium and zinc tellurides featuring high resolution and an extremely high sensitivity; tube is one inch in diameter with magnetic focusing and magnetic deflection; tube has separate mesh construction and lowheater power consumption; tube is intended for use in cameras for security ansurveillance applications where its high sensitivity and resolution are essential

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A516k0
