Major Components:

Cylindrical transistors 2; wire leads 3

Special Features:

Transistors with to-18 case and center to center distance of 0.250 inches, each transistor has three wire leads with a length of 0.500 inches and sections of heat sink are electrically isolated with epoxy adhesive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T01200
