Overall Length:

0.320 inches

Overall Height:

0.320 inches

Overall Width:

0.150 inches

Operating Temperature Range:

-55.0/+150.0 degrees celsius

Circuit Connection Style Designator:

Bridge 1 phase

Absolute Maximum Voltage Rating In Volts Per Characteristic:

70.7 forward voltage, total rms

Absolute Maximum Current Rating Per Characteristic:

1.000 amperes peak point current

Special Features:

Environmental protection: corrosion; inclosure feature: hermetically sealed

Material:

Silicon

Terminal Type And Quantity:

4 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A503h0
