Overall Length:

0.090 inches

Overall Diameter:

0.080 inches

Function For Which Designed:

Varactor diode

Features Provided:

Hermetically sealed case

Semiconductor Material:

Silicon

Power Rating Per Characteristic:

2.0 watts small-signal input power, common-collector preset

Maximum Operating Temperature Per Measurement Point:

175.0 degrees celsius ambient air

Special Features:

3 coaxial terminals

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A110a0
