Inclosure Material:

Glass and ceramic

Overall Length:

Between 0.735 inches and 0.765 inches

Overall Diameter:

Between 0.215 inches and 0.220 inches

Mounting Method:

Press fit

Features Provided:

Hermetically sealed case

Semiconductor Material:

Silicon

Special Features:

Ku frequency band; 201-jan holder; basic type no. 1n4603; reverse polarity; junction pattern arrangement: pn

Terminal Type And Quantity:

1 case and 1 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A110a0
