Overall Length:

1.000 inches

Overall Height:

0.250 inches

Overall Width:

1.000 inches

End Application:

Assembly control module no. 1071 for 10-gpm vacuum gravity/coalescer oil-water separator onboard 270 ft wmec coast guard vessels

Circuit Connection Style Designator:

Bridge 1 phase

Absolute Maximum Voltage Rating In Volts Per Characteristic:

24.0 source supply voltage

Absolute Maximum Current Rating Per Characteristic:

6.00 amperes total power dissipation

Mounting Method:

Plug-in

Special Features:

Full wave rectified input voltage, 6 amperes rms

Material:

Silicon

Terminal Type And Quantity:

4 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A503j0
