Special Features:

3-phase rectifier assembly; operating ambient temp range m65 degrees c to p150 degrees c; common cathode and 3 anode inputs; 60 hz resistive and inductive loading; peak working reverse voltage 600v; output current 10a; terminals nickel or tin plated; hermetically sealed; 0.161 in. Maximum diameter two holes; 1.197 in. Length between mtg facility; height 0.950 in. Max

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
