Overall Length:

1.250 inches

Overall Height:

0.500 inches

Overall Width:

0.750 inches

Operating Temperature Range:

-55.0/+150.0 degrees celsius

Circuit Connection Style Designator:

Bridge 3 phase

Absolute Maximum Voltage Rating In Volts Per Characteristic:

200.0 peak inverse voltage

Absolute Maximum Current Rating Per Characteristic:

125.00 amperes peak forward surge current and 50.00 amperes repetitive peak forward current

Mounting Method:

Threaded hole

Material:

Silicon

Terminal Type And Quantity:

5 turret

Specification Data:

15280-44-055798 manufacturers specification control

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A503j0
