Component Name And Quantity:

2 semiconductor device diode

Special Features:

Specified 50 volts, 30 mhz characteristics, output power = 150 watts, power gain = 17 db (typ), efficiency = 45% (typ) and superior high order imd; 150 w, to 150 mhz n-channel mos linear rf power fet

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A110a0
