Inclosure Material:

Plastic

Overall Length:

1.190 inches

Overall Diameter:

0.410 inches

Lens Transparency:

Transparent all light emitting diode

Component Name And Quantity:

7 light emitting diode

Mounting Method:

Press fit

Semiconductor Material:

Gallium phosphide all light emitting diode

Voltage Rating In Volts Per Characteristic:

120.0 reverse voltage, instantaneous all light emitting diode

Current Rating Per Characteristic:

12.00 milliamperes collector current, dc of standard range all light emitting diode

Power Rating Per Characteristic:

1.3 watts any acceptable preset all light emitting diode

Color Tone Produced Per Source:

Green semiconductor all light emitting diode

Maximum Operating Temperature Per Measurement Point:

50.0 degrees celsius ambient air

Special Features:

All light emitting diode junction pattern arrangement: pn

Terminal Type And Quantity:

1 case

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A110a0
